Space-o-mat Spacing Fork

"Fast & efficient spacing"

The Space-O-Mat forklift with the spacing forks are used for spacing the pots a high density to lower density. For spacing, the pots are placed in a staggered pattern in the fork (See image).

When spacing, the chains of the fork will run forward while driving backwards with the Space-O-Mat forklift. The requested distance between the pots will be set at the Space-O-Mat control box, which will be mounted on the Space-O-Mat forklift. With this parameter the speed of the chain is adjusted to the speed of the forklift, independent of the speed of the forklift. Now the rows of pots are extracted from one another and the requested spacing between the pots in being created.

“

For fast and efficient spacing.

”

Why choose the Space-O-Mat Spacing Fork?

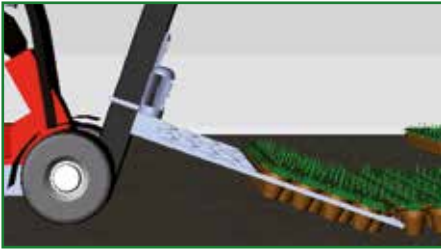

- ✓ Durable
- ✓ Efficient
- ✓ Adjustable

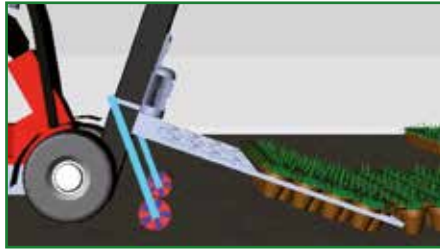

Space-o-mat Spacing Fork

"Fast & efficient spacing"

TYPE 1 NO SUPPORT

TYPE 2 WHEEL SUPPORT

TYPE 3 ROLLER SUPPORT

The space-o-mat spacing fork for potted plants is available in three different types

Characteristics:

- For less experienced drivers
- For concrete floors

Characteristics:

- For less experienced drivers
- For concrete floors

Characteristics:

- For unskilled drivers
- For concrete floors
- For root canvas floor

Specifications

Fork with Teeth height 30mm	Pot sizes 9 - 13cm
Fork with Teeth height 40mm	Pot sizes 13 - 17cm
Fork with Teeth height 50mm	Pot sizes bigger then 17cm
Length of the teeth	Ca 1800mm
Width of the fork	Available for 1800mm - 4500mm
Weight	450kg for a fork 3mtr wide suitable for pot size 13cm

Options

- Control box for control of the spacing fork
- Wheel support
- Roller support
- Quick release system for mounting fork to the forklift
